

CS3310 installation guide

1. Package includes:

1. Main board x 1
2. IR receiver and display board x 1
3. Remote handset
4. Screw pack x1

2. Installation

1. Fix the main control board on the chassis.
2. solder the signal source from the chassis to the CS3310 main board related area, solder the main board output point to the preamplifier PCB input point.
3. Connect the Display board to the main board with the ribbon cable provided. Cable with Red marked face the main board's volume side.
4. Solder the transformer to the main board, 2 x AC0-12V, 1 x AC0-9V or 3 x AC0-12AC
5. connect the CS3310 with AC, input sources should be "2", and the volume should be -80dB. You can control the volume and input sources from the front panel or the remote handset.
